Wisconsin is Home to a Diversity of Companies

The 2008 Wisconsin Biotechnology & Medical Device Business Directory contains over 300 companies that exhibit the limitless potential of our biotech and medical device industry - an industry that is one of the fastest growing in our state. In fact, Wisconsin's bioscience scene is exploding.

Wisconsin has the companies, from start-up to mature, from biotech to bioinformatics to medical devices. Wisconsin is home to biotechnology start-ups in agricultural biotech and in biopharmaceuticals. You will also find us as a place that features mid-sized

firms in biomedical instrumentation and biological reagents. Not to be outdone, we additionally have large firms and well-developed technologies in medical imaging, diagnostics, medical devices and food biosciences.

From the medical technologies of GE Healthcare - a \$15 billion unit of GE - to Cellular Dynamics, a stem cell company founded by Dr. James Thomson, Wisconsin puts you in good company. You are invited to explore the businesses and partners within the 2008 Wisconsin Biotechnology & Medical Device Business Directory.

Wisconsin Biotechnology and Medical Device Business Directory

Why Wisconsin for the Life Sciences?

The State of Wisconsin is positioned to make the jump into the top echelon destinations of the life sciences sector. Our state is a hotbed of life sciences activity and the businesses in the state fuel an emerging, exciting and growing location for biotechnology and medical device companies. We invite you to join us in Wisconsin for what is going to be a fun and fulfilling journey to a leadership position in the life sciences.

In Wisconsin, we have what you need to be part of a successful life sciences venture. Wisconsin provides a complete resource package, from start-up financing to manufacturing production assistance, uniquely designed to maximize profitability and success for life science ventures.

Biological Research

Wisconsin has a long and successful tradition of supporting research, particularly in the biological and agricultural arenas. Our state is the birthplace of human embryonic stem cell research and other groundbreaking technologies. The University of Wisconsin-Madison and its technology transfer arm – the Wisconsin Alumni Research Foundation – are world-renowned and research is prevalent throughout Wisconsin. The Medical College of Wisconsin in Milwaukee, Marquette University, UW-Milwaukee, UW-Platteville and UW-River Falls are strong in fields ranging from bioinformatics to biology to agricultural research. The Marshfield Clinic in central Wisconsin is our state's largest private medical research facility.

Capital Resources

Wisconsin continues strong growth in angel investment groups, venture capital dollars, and commitments from state government to help spur new growth and innovative ideas. The Wisconsin Department of Commerce has several technology grant, loan and tax credit programs available to assist with everything from business planning to research to working capital and equipment financing.

Wisconsin also has a great track record of attracting federal dollars for life science research and typically ranks in the top three states in the country in receiving these dollars.

Partnership Support

You never have to go it alone when you join the Wisconsin technology community. With statewide groups like the Wisconsin Biotechnology and Medical Device Association and the Wisconsin Technology Council, your life science venture is supported and you are provided with networking opportunities with others in your field. The Wisconsin Innovation Network has chapters throughout the state and has programs that focus on the needs and challenges faced by new and growing technology-based businesses. The Wisconsin Entrepreneurs' Network provides integrated support, throughout all regions of Wisconsin, to entrepreneurs in all industries and developmental stages. The University of Wisconsin Biotechnology Center, located on the UW-Madison campus, provides research, education and information services to the life sciences community.

Infrastructure Planning

Wisconsin understands the importance of investing in the future of the life sciences. A few examples include the \$175 million Wisconsin Institute for Discovery and a new \$134 million Healthstar Interdisciplinary Research Complex in Madison and The Medical College of Wisconsin and Children's Hospital new \$132 million research facility in Milwaukee. Wisconsin is also home to the National Stem Cell Bank and the new Institute for Influenza Viral Research.

Living Well

Family living or single life is affordable, safe and is as action-packed or relaxing as you want it to be. The schools are great, the housing is reasonably-priced and it doesn't take hours to drive to your destination – and there is plenty to do.

Come join our dynamic life sciences industry!

The 2008 Wisconsin Biotechnology & Medical Device Business Directory was underwritten with grants from the Wisconsin Department of Commerce, the Fitchburg Technology Neighborhood and SciLog, Inc.

The sources of data for the Directory include listings contributed by Madison Gas & Electric Company and the Wisconsin Biotechnology and Medical Device Association. The information was compiled by Forward Wisconsin, the state's public-private business marketing

group, with Reed Sendেকে Krebsbach (R S + K) coordinating the cover design, layout, pre-press and final printing.

Inclusion in this directory does not constitute an endorsement of the business, nor is exclusion intended to adversely reflect upon the reputation of any business. Any errors, misinformation, or omissions are unintentional. Please contact Forward Wisconsin for any corrections that need to be made in future directories.

“From scientists in their labs, to the entrepreneurs with an idea, to the CEOs that want to invest, to the teachers and professors educating our young minds, Wisconsin is leading the way in the life sciences. I encourage you to explore the businesses and resources that make up our state’s dynamic and exciting biotechnology and medical device sectors.”

Wisconsin Governor Jim Doyle

Wisconsin Biotechnology and Medical Device Business Directory

Interested in Wisconsin for a business, investment or research opportunity? Forward Wisconsin and the Wisconsin Department of Commerce can help.

Forward Wisconsin’s job is to market Wisconsin’s business advantages outside the state to inform industry and business leaders about the positive benefits of living, playing, and doing business in Wisconsin. Forward Wisconsin works directly with business executives, real estate brokers, site selection consultants and other individuals that are interested in bringing business and investment to Wisconsin. The life sciences are a key target industry for Forward Wisconsin and we aggressively promote Wisconsin as an excellent option for life science firms and professionals.

Forward Wisconsin’s success depends in large part upon our close working relationship with the Wisconsin Department of Commerce. The Wisconsin Department of Commerce wants to help our state’s innovative companies grow and thrive. Commerce has access to numerous financial and technical assistance programs that encourage and stimulate the start up, modernization and expansion of high tech businesses in Wisconsin. The Department provides a variety of services to firms in the science and technology fields, helping them locate resources, capital, and research partners. Forward Wisconsin and Commerce also work with technology associations, research universities, tech transfer organizations and other business and financial networks.
